

## Action Camera GoPro Hero 10 + 128GB Card

The GoPro HERO 10 Black makes it easy to capture action moments on video. The HERO 10 has a large 23-megapixel sensor and a fast GP2 image processor. This allows you to film in 5.3K at 60fps or in 4K at 120fps. Thanks to the high frame rate, you capture movement fluidly. HyperSmooth 4.0 image stabilisation ensures that camera shake is not visible on screen.

You easily attach the camera to a mount with the two folding mounting plates on the bottom. Choose a mount that suits your usage situation. Take special timelapse shots with the TimeWarp 3.0 function, for example of the sunset. The HERO 10 has a screen on both the front and back. The front screen has a high refresh rate, making the image look smooth.

### Specifications

- Filming in 5.3K at 60fps
- 23-megapixel photos with SuperPhoto and enhanced HDR
- HyperSmooth 4.0 with built-in leveling
- Live streaming in 1080p
- Rugged and waterproof to 10m
