

Tough Olympus TG-7 Camera

The OM SYSTEM Tough TG-7 compact camera is 'tough' for good reason, because this camera can take a beating! Thanks to its strong casing, the TG-7 is shockproof and can withstand a fall from a height of up to 2.1 metres and can withstand a load of up to 100 kilograms. But it can take even more; thanks to its seals and double locking mechanism, the TG-7 is also water-resistant to a depth of up to 15 metres. With its bright f/2.0 lens and high-resolution, high-speed image sensor and TruePic VIII image processor, the TG-7 camera captures photos and videos with incredibly high image quality.

SPECIFICATIONS

- Waterproof to 15 metres
- Shockproof for falls of up to 2.1m
- Bright f/2.0 lens
- Withstands loads of up to 100kg
- Frost-resistant down to -10 Celsius
- Dustproof
