

TOP MATTRESS

Top mattress foams are designed to provide optimal support and comfort by utilizing air trapped within aerated materials, eliminating the need for traditional spring systems.

All our top mattress foams are IMO/MED certified, making them fully compliant with marine and offshore safety standards.

They are supplied as rolled and vacuum-packed units for efficient transport and handling onboard.

The top mattresses are available in thicknesses ranging from 5 to 10 cm and are equipped with corner straps to securely fix them to the underlying mattress, ensuring stability in dynamic maritime environments.

VACUUM PACKED

SPECIFICATIONS:

FOAM DENSITY	25 KG/MC
MATERIAL	POLYESTER 350 GR/SQM THICKNESS 350MM FIRE RETARDANT FABRIC LIBERTY FR OR ZENIT 14
