LOGITECH Z333 Multimedia PC Speakerset

The Logitech Multimedia Speakers Z333 is a powerful 2.1 speaker system for the PC. The speaker set has a peak power of no less than 80 Watts (40 Watts RMS) and a deep bass for a lifelike experience while watching a movie, listening to music or playing a game. A wired remote control is supplied with the Z333 to control the volume and to switch it on and off. Adjust the bass to your liking with the dedicated control knob on the back of the subwoofer.

You connect the Z333 to your PC via RCA or the 3.5 mm mini jack connection and there is a headphone connection if you don't want to disturb anyone. . It is possible to connect two devices via the 3.5 mm mini jack connection while you do not have to disconnect when switching between sound sources.
