

Powerline PSM144X Smith Machine

The Powerline Smith Machine is a true powerhouse, often imitated but never duplicated.

It combines the sophistication of free weight training with resistance, all while ensuring safety and control through a fitness machine. The frame of the Powerline PSM144X Smith Machine is 5 cm x 5 cm thick and made of 12-gauge steel pillars for support. It is suitable for weight plates with a 30 mm bore, allowing you to use 50 mm weight plates.

Weight plates are available upon request.

The ladder-like base frame provides you with heavy-duty 12-gauge square pillars offering 14 locking options.

The machine also features extremely durable limiters with large safety pins for easy adjustment.
