

Inspire incline/decline Bench incl Leg extension, Preacher curl and Storage rack

Both the seat and back of the sofa are extremely wide and feature thick premium upholstery. The high quality of the upholstery makes it easy to clean, and will not stink. The seat is easily adjustable with the built-in levers. The bench features 5 different backrest positions and 2 different seat positions, and is designed for heavy-duty use up to 270 kg. The casters make the workout bench easy to move around. You will not easily find a scratch as it is well protected with powder coating which protects the bench from scratches.

The Inspire Preacher Curl attachment is the perfect addition to your FT2 workout bench. The armrest and bar catch can be adjusted to fit any arm length. Take a seat on the extra-wide cushion, ergonomically position your arms on the bench and you are ready to begin your targeted biceps workout! The Inspire curl pult is a thoughtful, high-quality device for isolated fitness studio-level bicep training.

The Inspire Leg Curl / Extension Attachment connects to Inspire workout benches. Use the attachment to comfortably perform leg extensions or leg curls. The built-in weight horn allows you to add weight plates (50mm) for added resistance. This attachment also connects to the Inspire FT2 cable resistance system.
